RE: Resubmission of manuscript for publication in *PNAS*

Dear Professor May Berenbaum,

Thank you for inviting a resubmission of our paper entitled “**Uncovering thousands of endosymbiont DNA transfer events within single cockroach genomes**” by Kyle Ewart, Maxim Adams, Zhuzhi Zhang, Louise Baker, Kokuto Fujiwara, Yoshinobu Hayashi, Leo Featherstone, Oscar Lo Lu, Jil Helbling, Maya Moral, Kiyoto Maekawa, Harley Rose, Aaron Jex, Simon Ho and Nathan Lo.

We enclose our revised manuscript. We are very thankful for the comments from the Editorial Board Member and three Reviewers. We have addressed these comments as detailed in the attached ‘responses to comments’ document. We believe we have improved the manuscript following these recommendations and hope that it is now suitable for publication in *PNAS*.

We have listed all of the Reviewer’s comments (in blue) and describe (in black) how we have addressed each of them, referring to line numbers in the revised version of the manuscript (based on the manuscript file without track changes to avoid issues with line numbering). To facilitate cross-referencing, we have numbered the comments and added the prefixes ‘R1’ (=Reviewer 1), ‘R2’ (=Reviewer 2), and ‘R3’ (=Reviewer 3).

Please let us know if you need any further information. Thank you for your consideration of this manuscript.

We look forward to hearing from you.

Kind regards,
On behalf of all coauthors,

Kyle Ewart
